S O A R | SAVE OUR AMERICAN REPUBLIC

Agenda 47 | President Trump on Making America Energy Independent Again

"Joe Biden's war on American energy is one of the key drivers of the worst inflation in 58 years, and it's hitting every single American family very, very hard."

- I will deploy a team of warrior lawyers to hunt down every unnecessary regulation in the federal registry that hampers domestic production.
- We will rapidly issue approvals for all worthy energy infrastructure projects with a focus on maximum speed to bring prices down rapidly.
- We are going to put thousands of Americans to work building the power plants, pipelines, grids, ports, refineries, and shipping terminals of tomorrow.
- We are going to have very inexpensive energy again, like we did just two and a half years ago.
- This great undertaking will also help restore hope and aspiration to America's young people, instead of being irrationally terrified by political predictions of climate apocalypse.
- Nobody has more liquid gold under their feet than the United States of America. And we will use it and profit by it and live with it. And we will be rich again and we will be happy again. And we will be proud again.
- When I'm back in the White House, I will bring back a pro-American energy policy at long last.

Trump promises to put America First regarding energy production. Our US pollution policies keep our world far safer and cleaner than having foreign nations produce energy in a lawless and unaccountable way.
