## **Agenda 47 | President Trump Continues to Lead on Protecting Americans from Radical Leftist ESG Investments (2/25/23)**

*“I'm very proud that as President, I issued a historic rule banning Wall Street and employers from pouring your 401Ks, pensions, and retirement accounts into so called ESG or Environmental, Social, and Governance investments for political reasons—strictly for political reasons.”*

- President Trump was the first major figure to call out the radical ESG cabal for what it is, an attempt to take control of America's wealth through corporations, institutions, and retirement funds using social censure, boycotts, and other tactics to compel their compliance with whatever “sustainability” definition the ESG leftists demanded they invest in. (Environmental, Social, Governance)
- He correctly identified a further danger posed by the ESG cabal regarding Americans' retirement accounts wherein companies would invest pensions in ESG defined, so-called sustainability investments. This only served to siphon off retirement funds, placing them in the hands of radical leftist causes masquerading as “green, sustainable, socially responsible, mandated investments.
- He will immediately ban ESG investments through executive order and work with Congress to enact a permanent ban.

***President Trump is mindful of all Americans in every walk of life and at every age. He knows how important it is for people nearing retirement or already retired to have secure and reliable financial investments and resources.***

Scan to watch President Trump deliver short video messages identifying the problem and revealing his solutions.
