S O A R | SAVE OUR AMERICAN REPUBLIC

## Agenda 47 | Rescuing America's Auto Industry from Job-Killing Policies

*"This ridiculous Green New Deal crusade is causing car prices to skyrocket while setting the stage for the destruction of American auto production."*

- President Trump will stop Biden's termination of the internal combustion engine and his April 2023 emission regulations on light, medium, and heavy-duty vehicles, that are projected to kill **117,000 auto manufacturing jobs**.
- President Trump will also end Biden's CAFE fuel economy standards. These standards will cost the auto industry an estimated \$200 billion dollars. They will raise the average cost of vehicles by more than \$1,000, according to **the Biden administration's own estimates**, at a time when the average price of a new car is **\$49,500**.
- President Trump will secure the USMCA's protections for American auto workers from globalist assault. He will communicate to Canada and Mexico that FULL compliance with the terms of the USMCA is not optional, unlike Biden who lowered up to 33% the requirement that USA-made parts must be used.
- President Trump will stop the flow of American tax dollars through Joe Biden's so-called Inflation Reduction Act that actually subsidize Chinese electric vehicle battery companies.
- A national tariff policy will put AMERICA FIRST, again. It will restore President Trump's successful first term trade policies that **reduced** America's trade deficit, **grew** wages, and created 500,000 new manufacturing jobs.

*Voters in Michigan, Ohio, Indiana, Georgia, South Carolina, and North Carolina who want a healthy auto-industry must reelect Donald Trump for President. In fact, all voters in the United States who want lower car pricing, affordable fuel, and a great economy must vote for President Trump.*

Scan to watch President Trump deliver short video messages identifying the problem and revealing his solutions.
